

Phishing Checklist

Email Verification Checklist

- ☐ Check the sender's email address for slight misspellings.
- ☐ Look for generic greetings (e.g., 'Dear Customer').
- ☐ Hover over links to verify the URL before clicking.
- ☐ Watch for urgent or threatening language (e.g., 'act now').
- ☐ Check for poor grammar or unusual formatting.
- ☐ Do not download unexpected attachments.
- ☐ Verify with the sender through a known communication channel.

Website Verification Checklist

- ☐ Verify the URL starts with HTTPS and shows a padlock icon.
- ☐ Check for misspellings or odd domain names (e.g., amaz0n.com).
- ☐ Avoid entering credentials unless you are certain the site is legitimate.
- ☐ Look for signs of a professional, consistent design and content.
- ☐ Check the website's security certificate by clicking the padlock icon.
